

INSTALLATION INSTRUCTIONS FOR LED POND AND LANDSCAPE LIGHTS

CAUTION: THESE LIGHTS ARE DESIGNED FOR OPERATION ON 12VAC ONLY. OTHER VOLTAGES WILL CAUSE FAILURE OF THE LED MODULE.

- 1. A 15' ELECTRICAL CORD IS SUPPLIED WITH THE UNIT. ONLY TWO WIRES ARE REQUIRED TO OPERATE THE LED MODULE; THERE IS NO POLARITY ISSUE WITH AC, SO EITHER WIRE CAN BE CONNECTED TO EITHER WIRE ON THE POWER SUPPLY OUTPUT.**
- 2. IN THE EVENT THAT A UNIT IS SUPPLIED WITH A 3 WIRE POWER CORD, SIMPLY CUT THE YELLOW OR GREEN WIRE AS IT IS NOT REQUIRED FOR THE INSTALLATION. USE ONLY 2 WIRES FOR THE POWER CONNECTION—GENERALLY THE COLORS ARE BLUE, BROWN OR RED.**
- 3. THE UNIT CAN BE SECURELY MOUNTED USING SCREWS OR BOLTS WITH THE THREE PRE-DRILLED HOLES IN THE BASE.**
- 4. THE UNIT CAN BE “AIMED” BY LOOSENING THE BOLT HOLDING THE BODY RING THEN RE-TIGHTENING AT THE DESIRED POSITION.**
- 5. THE LED MODULE WILL LAST UP TO 100,000 HOURS, SO THERE IS NO NEED FOR REPLACEMENT.**
- 6. THE UNIT HAS A SEALED LENS AND A WATER-TIGHT GLAND AT THE POWER CORD INPUT FOR A WATERPROOF INSTALLATION.**
