

SYNCHRONIZING JEM LED POND AND LANDSCAPING LIGHTS (0724-1290-211/xx)

THESE LIGHTS ARE QUITE SIMPLE TO OPERATE IN A SYNCHRONIZED MODE WHEN TWO OR MORE UNITS ARE OPERATED FROM THE SAME POWER SUPPLY.

- 1. ATTACH THE FIRST LIGHT TO THE POWER SUPPLY; TURN THE POWER SUPPLY OFF THEN ON AGAIN IN SUCCESSION UNTIL THE BLUE COLOR IS FOUND (OFF/ON NO MORE TWO SECONDS DURATION)**
- 2. NOW ATTACH THE NEXT LIGHT TO THE SAME POWER SUPPLY AND PERFORM THE SAME OFF/ON AS ABOVE UNTIL BOTH UNITS SHOW THE BLUE COLOR (THIS CAN TAKE A LITTLE TIME AND PATIENCE TO ACHIEVE).**
- 3. ONCE THE FIRST TWO UNITS ARE ENERGIZED AND SHOW BLUE COLOR, SIMPLY ADD ADDITIONAL UNITS, ONE AT A TIME. EACH ADDITIONAL UNIT SHOULD SHOW BLUE WHEN ENERGIZED WITHOUT THE OFF/ON ACTION NEEDED FOR THE FIRST TWO.**
- 4. TO SWITCH TO ANY OTHER COLOR OR THE COLOR ROTATION MODE, ONCE ALL BLUE SHOWS, SIMPLY SWITCH THE POWER SUPPLY OFF THEN ON (NO MORE THAN TWO SECONDS), UNTIL THE DESIRED COLOR OR ROTATION MODE IS ATTAINED.**
- 5. IF FOR ANY REASON THE LIGHTS GO OUT OF SYNCHRONIZATION, REPEAT STEPS 1 – 4 AS ABOVE.**
